PRODUCT BRIEF

Elixir Muse™

Elevate your writing. Protect your privacy.

Elixir Muse™ is a browser-based writing assistant powered by Elixir Ai that gives you the ultimate creative edge, without compromising your privacy. Draft, analyze, edit, and translate with professional precision, all while keeping your proprietary ideas entirely yours.

Unlike other platforms, we have a strict "no-trace" policy: we never store your data, log your prompts, or use your content to train our models.

Who Elixir Muse is for

Individuals and creators: Writers, freelancers, students, job seekers — anyone who wants to enhance their writing but doesn't want their content stored, logged, or harvested to train AI models.

Businesses and teams: Marketing, Product, Legal, Support, and any other team or group that manages content generation.

Companies in regulated industries: Iterate and revise critical documents like statements, onboarding materials, policy documents, and disclosures against built-in rule sets for TILA, HIPAA, GDPR, KYC/AML, AP Stylebook, and more.

Unlock the full potential of your writing with Elixir Muse

To ensure you only pay for the high-performance computing power you actually use Elixir Muse utilizes a credit system. Think of this as a fuel tank: basic editing is always free, while advanced AI tasks like deep analysis and translation consume credits based on the complexity of the job.

Key Features

Iterate content with the power of AI

Instantly simplify, summarize, analyze, and adapt complex written content to increase comprehension and shorten review cycles.

Analyze spelling, grammar, and style

Run comprehensive checks with a unified report on accuracy, readability, and tone. Correct errors fast with one-click fixes.

Craft, draft, and refine in 100% privacy

Elixir Muse doesn't store any data, train any models, or log any prompts from your content. Rule-based mode runs in your browser with zero external calls. AI mode processes and discards — your text is never stored or retained.

Translate into 90+ languages

Produce consistent, accurate multilingual content and accessible communications (including Braille) for large, diverse audiences.

Easily comply with brand guidelines and regulations for written text

Validate text against business rules, regulatory guidelines, and brand standards and catch issues before production.

Transparent by design

A live privacy audit, public software bill of materials, and automated vulnerability scanning, all verifiable on our Security page. No black boxes.

Your conversational AI assistant

More than an error checker, a creative partner that understands your context, navigates idioms, and captures the nuance of your message. Your conversation history stays private to your browser — never on our servers.

Ready to blow the doors off your next project? Subscribe today at elixirmuse.ai and get the high-octane fuel you've been missing.
